[The Domestic Sources of American Foreign Policy](#) Sep 02 2020 The new edition of this leading reader for courses in American foreign policy offers students an up-to-date, highly accessible introduction to the broad array of domestic factors influencing U.S. policymakers. Editor James M. McCormick has carefully selected two dozen current insightful and sometimes controversial essays by a distinguished group of leading experts-- scholars, journalists and public officials--including 11 new and 7 updated contributions. In his introduction, McCormick evaluates the challenges facing U.S. foreign policy makers in recent years and assesses the Obama Administration's successes and failures in its efforts to pursue a new direction in American foreign policy. The volume is then divided into three major parts with an opening essay by the editor to place each part in context and then a selection of essays that analyzes the topic in that part in more detail. Part I, "The Societal Environment," contains a series of articles on the position of interest groups, the impact of military experience, the effect of public opinion, and the role of elections and political parties on foreign policy. Part II, "The Institutional Setting," examines how various political institutions, such as Congress, the presidency, and various bureaucracies (e.g., the National Security Council, the intelligence community) shape American foreign policy. Part III, "Decision makers and Their Policymaking Positions," provides various case analyses over several administrations to illustrate how individuals and bureaucracies affect the foreign policy decision making at the highest levels of government.

International Management Mar 28 2020 McFarlin and Sweeney provide students with an accessible, application-oriented approach to international management, focusing on key challenges including motivation, leadership, and communication across cultural boundaries. The book gives students a global perspective on the process of hiring, training, and developing employees, as well as strategic decision making in relation to foreign markets. Questions, case studies, examples of creative problem solving, and testimonials from real-world managers operating in the international arena are just a few of the tactics McFarlin and Sweeney use to help students begin to think about applied theory on a global level. All chapters have been updated with recent articles from leading business sources and academic journals, and new case studies have been incorporated.

The Social Psychology of Bargaining and Negotiation Dec 29 2022 The Social Psychology of Bargaining and Negotiation focuses on the integrative survey of work done in social psychology on the processes of negotiation and bargaining. The publication first takes a look at bargaining relationship, an overview of social psychological approaches to the study of bargaining, and the social components of bargaining structure. Discussions focus on the number of parties involved in the bargaining exchange, factors affecting bargaining effectiveness, structural and social psychological characteristics of bargaining relationships, and availability of third parties. The text then examines the issue components of bargaining structure and bargainers as individuals, including individual differences in personality and background, interpersonal orientation, issue incentive magnitude and reward structure, and intangible issues in bargaining. The book ponders on social influence and influence strategies and interdependence. Topics include motivational orientation, parameters of interdependence in

bargaining, overall pattern of moves and countermoves, and appeals and demands. The publication is a valuable source of data for researchers interested in the social psychology of bargaining and negotiation.

The Regulation of Corporate Disclosure Sep 21 2019 The Regulation of Corporate Disclosure, Third Edition is a complete and up-to-date handbook on the issue of corporate disclosure, covering the impact of the federal securities laws on both informal communications and the process of communicating with shareholders. The Third Edition expands topics previously covered, addressing the legal issues and practical concerns surrounding implementation of the Private Securities Litigation Reform Act of 1995, the Sarbanes-Oxley Act of 2002, and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The book also has an in-depth treatment of managementand's discussion and analysis (MDand&A), something that, although appearing in required SEC filings, involves many of the same difficult and complex issues raised by the informal disclosure process. Also addressed are: SEC reforms of the periodic reporting process; issues pertaining to stock research analysts and conflicts of interest; and various relevant corporate governance requirements and their disclosure implications. Critical areas analyzed include ;Disclosure requirements and anti-fraud provisions The duty to disclose Dissemination Issues involving materiality Disclosure of bad news Negotiations Dealing with analysts And much more!

Policing European Metropolises Apr 28 2020 Understanding the politics of security in city-regions is increasingly important for the study of

contemporary policing. This book argues that national and international governing arrangements are being outflanked by various transnational threats, including the cross-border terrorism of the attacks on Paris in 2015 and Brussels in 2016; trafficking in people, narcotics and armaments; cybercrime; the deregulation of global financial services; and environmental crime. Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders, as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest. This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges, and considers problems of and for policing in city-regions in the European Union and its single market. Bringing together experts from across the continent, *Policing European Metropolises* develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country. This book will be of value to police researchers in Europe and abroad, as well as postgraduate students with an interest in policing and urban policy.

Negotiating for Peace in the Middle East (Routledge Revivals) May 30 2020 Ismail Fahmy was Minister of Foreign Affairs and Deputy Premier of Egypt, but resigned in protest against President Sadat's visit to Jerusalem in 1977. This book, published in 1983, presents the first portrait of Sadat from within the Arab ruling elite, and gives unique coverage of the crucial negotiations that took place between Arab leaders, which determined the key events during this period. Fahmy vividly recounts the years when prospects for a permanent peace in the Middle East seemed a real possibility and presents a damning portrayal of the roles that Kissinger, Nixon and Carter played in events. This is a fascinating account of the struggle for peace in the Middle East, written from the unique perspective of a hugely influential contemporary at the heart of the dialogue.

Psychological Aspects of Crisis Negotiation Nov 16 2021 *Psychological Aspects of Crisis Negotiation, Third Edition*, explores the methods and strategies for confronting the nine types of subjects typically encountered in hostage/suicide sieges by correctional staff and law enforcement crisis negotiators. Strentz, an experienced negotiator who designed and directed the FBI's hostage negotiator program, lays out the critical elements that are required for a successful encounter with a hostage taker or other malfeasant. This book highlights psychological dynamics of negotiations as they apply to the negotiator, the hostage, and the subject. It discusses the predictors of surrender versus the need for a tactical intervention and examines the phases of a hostage crisis and the changing focus as the crisis develops. Referencing historical events such as the Bay of Pigs invasion and the Challenger and Columbia incidents, this text demonstrates how faulty group decision making can spell tragedy. Enhanced with case studies to put the material into context, this third edition also includes new chapters on the SWAT team/crisis negotiator interface and on the genesis of the increased incidence of mentally ill hostage takers. Based on decades of experience in the field and practical advice from a national expert, this volume arms negotiators with the knowledge and tools they need to defuse crises and increase the odds that hostages will survive.

Social Psychology, Third Edition Aug 13 2021 This definitive work--now extensively revised with virtually all new chapters--has introduced generations of researchers to the psychological processes that underlie

social behavior. What sets the book apart is its unique focus on the basic principles that guide theory building and research. Since work in the field increasingly transcends such boundaries as biological versus cultural or cognitive versus motivational systems, the third edition has a new organizational framework. Leading scholars identify and explain the principles that govern intrapersonal, interpersonal, intragroup, and intergroup processes, in chapters that range over multiple levels of analysis. The book's concluding section illustrates how social psychology principles come into play in specific contexts, including politics, organizational life, the legal arena, sports, and negotiation. New to This Edition *Most of the book is entirely new. *Stronger emphasis on the contextual factors that influence how and why the basic principles work as they do. *Incorporates up-to-date findings and promising research programs. *Integrates key advances in such areas as evolutionary theory and neuroscience.

Case Studies in US Trade Negotiation Volume 2 Jul 24 2022

Between 1992 and 2000, US exports rose by 55 percent. By the year 2000, trade summed to 26 percent of US GDP, and the United States imported almost two-thirds of its oil and was the world's largest host country for foreign investors. America's interest in a more open and prosperous foreign market is now squarely economic. These case studies in multilateral trade policymaking and dispute settlement explore the changing substance of trade agreements and also delve into the negotiation process—the who, how, and why of decision making. These books present a coherent description of the facts that will allow for discussion and independent conclusions about policies, politics, and processes. Volume 2 presents five cases on trade negotiations that have had important effects on trade policy rulemaking, as well as an analytic

framework for evaluating these negotiations.

The Roots of Urban Renaissance Jul 12 2021 An acclaimed history of Harlem's journey from urban crisis to urban renaissance With its gleaming shopping centers and refurbished row houses, today's Harlem bears little resemblance to the neighborhood of the midcentury urban crisis. Brian Goldstein traces Harlem's Second Renaissance to a surprising source: the radical social movements of the 1960s that resisted city officials and fought to give Harlemites control of their own destiny. Young Harlem activists, inspired by the civil rights movement, envisioned a Harlem built by and for its low-income, predominantly African American population. In the succeeding decades, however, the community-based organizations they founded came to pursue a very different goal: a neighborhood with national retailers and increasingly affluent residents. The Roots of Urban Renaissance demonstrates that gentrification was not imposed on an unwitting community by unscrupulous developers or opportunistic outsiders. Rather, it grew from the neighborhood's grassroots, producing a legacy that benefited some longtime residents and threatened others.

Taxation in the Digital Economy Aug 25 2022 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation. Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing, processing, analyzing, and responding to information provided by taxpayers and others concerning taxpayers' affairs. By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy. Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions, revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes. This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy. The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces, as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs. The full implications of the COVID-19 crisis are still too uncertain to predict, but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances. This, in turn, may shape the preference for, and the nature of, both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them. This book will be a timely reference for those researching on taxation in digital economy and for policy makers.

Negotiating Social Space May 22 2022 Small and micro enterprises have been an important theme in development thinking since 1950s, yet for a variety of reasons East African governments and administrations have been sceptical about their role in their own countries' development.

While many constraints have been lifted by the more liberal policies of the 1990s, many micro entrepreneurs and their labourers, primarily women, are still fighting for an enlarged social space. The papers in this book describe these strategies of negotiation between rural micro enterprises and the new liberalised rural economy.

The New Economic Diplomacy Nov 28 2022 This third, fully updated edition of *The New Economic Diplomacy* explains how states conduct their external economic relations in the 21st century: how they make decisions domestically; how they negotiate internationally; and how these processes interact. It documents the transformation of economic diplomacy in the 1990s and 2000s in response to the end of the Cold War, the advance of globalization and the growing influence of non-state actors such as private business and civil society.

Peace versus Justice Feb 07 2021 This book examines the costs and benefits of ending the fighting in a range of conflicts, and probes the reasons why negotiators provide, or fail to provide, resolutions that go beyond just 'stopping the shooting.' A wide range of case studies is marshaled to explore relevant peacemaking situations, from the end of the Thirty Years' War and the Napoleonic Wars, to more recent settlements of the late 20th and early 21st centuries—including large scale conflicts like the end of WWII and smaller scale, sometimes internal conflicts like those in Cyprus, Armenia and Azerbaijan, and Mozambique. Cases on Bosnia and the Middle East add extra interest.

Spiritual Care in Practice May 10 2021 These diverse case studies make a compelling case for the importance of effective spiritual care in healthcare and provide unprecedented insight into the essential role of the chaplain within the healthcare team. Presented alongside critical reflections and responses from professionals within chaplaincy,

psychology, psychiatry and nursing, they provide an honest and detailed look into how healthcare chaplains actually work with the people in their care and reveal the vital role of narrative and imagination in effective transformative practice. From a 16-year-old with a belief that God would enable a miraculous recovery from paralysis, to an African man with a history of psychosis and depression whose cultural belief in witches complicated his treatment, to a dying Jewish man, aggressive and isolated due to his traumatic life experiences, each case includes insight into the patient's needs and chaplain's perspectives, discussion of spiritual assessments and spiritual care interventions, and accounts of

significant encounters and dialogues. The nine paediatric, psychiatric and palliative case studies and reflections in this ground-breaking book will enable chaplains to critically reflect on the spiritual care they provide and communicate their work more effectively, help healthcare professionals develop a clearer understanding of the care chaplains deliver, and provide an informed perspective for those who develop policy around spiritual care and need to make the case for chaplaincy services.
